

Free listing in PRISM's Specifiers' Guide to the Latest in Green Building Products

Calling all sustainable building manufacturers- make sure you are listed in PRISM's Specifiers' Guide to Green Building Products

The online May/June edition of PRISM Sustainability in the Built Environment will feature the **Specifiers' Guide to Green Building Products**—a handy guide to the latest and greatest in sustainable building products. These include products that are either sustainable in and of themselves, OR, assist in making a project sustainable, for example, use in biophilic design.

Information is scattered across the web and finding information on the latest in green building technologies can be arduous. The Specifiers' Guide to Green Building Products will serve as an easy-to-use resource covering the latest in sustainable building technologies, with helpful product information and direct links to additional product details.

*Please note PRISM covers commercial, institutional and multifamily structures. PRISM does not cover residential.

This listing is for new individual products, product lines or product systems. For example, a curtain wall system. Please select only one.

Please provide the following information an attractive horizontal image at least 1024px wide. Please include any applicable image credits. Email your listing to Emma Kapp emmakapp@prismpub.com.
Deadline June 29.

1. **Product name:**
2. **Company name:**
3. **Description (100-word count maximum)**
 - What is the number one thing you would like a specifier to know about your product? In other words, why would an architect specify *your* product?
 - What makes your product sustainable (materials, usage, etc.)? A product may not necessarily be sustainable in and of itself, however may be used to make a design/project sustainable – please explain.

- Where can the architect/specifier get more information about your product (specification data) and appropriate links to that information (no email addresses please!). Please also include a link to your website.

4. **Category (please select the category that best describes your product):**

Air barrier, vapor barrier, insulation (coatings, foam, wool, wrap and other materials)

Ceiling materials

Coatings - please select type(s)

Anti-graffiti

Anti-microbial
